

*Foil without heat,
No Sealing Required*

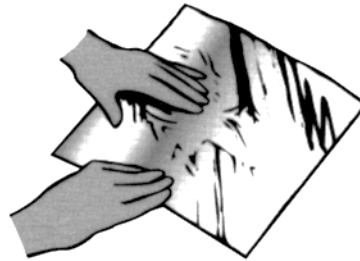

Works with any foil adhesives.
Add foil highlights to any surface.

1. Draw with foil adhesive or Jones Tones Plexi Glue, making dots, squiggles, outlining, etc... Let dry until PLEXI TURNS CLEAR (4 to 8 hours). You can speed drying time with a hair dryer, by laying project in a sunny window, or in a warm car with windows closed.

2. Place foil COLORED SIDE UP onto design. Press with fingers and simply lift foil. Continue to rub foil over design until all areas are covered.

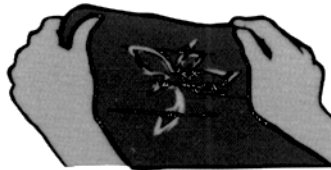

3. TO CORRECT A MISTAKE, apply a THIN COAT of Plexi Glue over area to be corrected. Let dry 15 to 30 minutes.

Re-apply foil - YOU CAN EVEN CHANGE THE COLOR - it will look brand new. Freshly foiled areas will not pick up foil again.

*Jones Tones Plexi Glue
Stretches*
Great on Stockings & Costumes.

Foil Care Instructions:

HAND WASH ONLY! Use mild soaps or shampoo.

** To protect craft projects, a generic varnish spray may be applied for protection against dust and soiling.*

Warranty: This product is guaranteed to be free of defects. We cannot be held responsible for any results obtained except to replace the foil if defective.
