

# PEBEO SILK

*From a movement, a sensation, draw and create on silk or wool your moment's emotion.*

*With PEBEO SILK your hand can dream, and your ideas can flow.*

*Let your tastes and desires control the flow of PEBEO SILK.*

*A range of 80 perfectly miscible concentrated colours.*

*PEBEO SILK, envied fashion colour.*

*PEBEO SILK colours are water soluble.*

*To dilute colours, use concentrated PEBEO SILK thinner to obtain perfect uniformity.*

*Colours do not adulterate the silk's brilliance and they become very intense after steam fixing (approx. 3h). Steam fixing guarantees excellent resistance to light and washing.*

## PEBEO SILK USE

This product can be used for:

- silk-screen printing,
- free-hand painting,
- salt technique,
- serti technique.

- Apply colour directly to silk, after using PEBEO SILK thickener.
- Apply PEBEO anti-diffuser before painting and let dry ; when dry, you can paint free hand without rapid diffusion.

### Serti

The colourless gutta can be coloured by adding Pebeo Solvent Stain Glass ; the water-based gutta can be coloured by adding Pebeo Silk Colours.  
To obtain pearly serti, use the SETACOLOR PEARL as guttas.

Colour is steam-fixed as for other shades. You can read on these different techniques in "Style of Painting on Silk" chapter by Régine Libessars, Fleurus Publications, "Loisirs" Collection, plan n° 17.
